If your institution of higher education aims to implement comprehensive student mental health support systems, these federal grants may provide the financial support you need to realize your goals. The majority of the federal funding opportunities listed below can be used to pay for JED Campus, a collaborative process of program and policy development that helps you build upon your existing student mental health offerings. Click the link in the last column for more details on each opportunity.

Note: LEA stands for local educational agency, which refers to a public board of education or any other public authority legally given administrative control or direction of public elementary or secondary schools. SEA stands for state educational agency, which refers to state boards of education or any other agency or officer primarily responsible for a state’s supervision of public elementary or secondary schools.
